MySQL Installation

Open MySQL Community Downloads from this link [MySQL :: Download MySQL Installer](https://dev.mysql.com/downloads/installer/) to download MySQL installer.

MySQL Community Downloads

MySQL Installer

General Availability (GA) Releases Archives

MySQL Installer 8.0.22

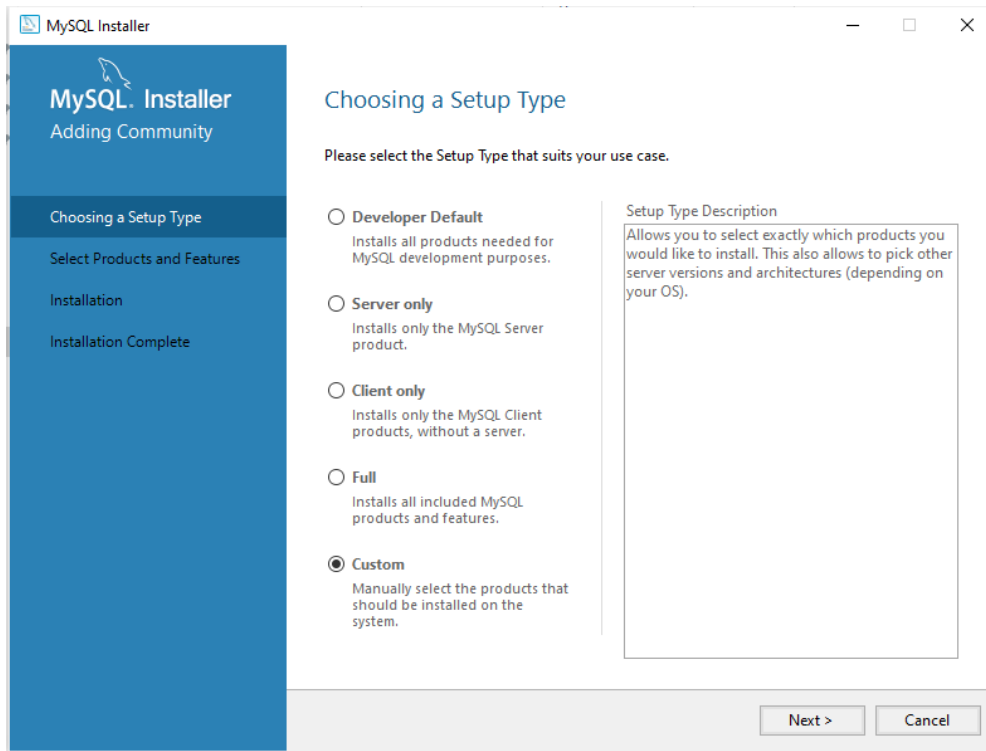

Select Operating System: Microsoft Windows Looking for previous GA versions?

Windows (x86, 32-bit), MSI Installer	8.0.22	2.5M	Download
(mysql-installer-web-community-8.0.22.0.msi) MD5: 6d4c2f4fe997f1e9e8a02b105e7f72c8 Signature			
Windows (x86, 32-bit), MSI Installer	8.0.22	405.2M	Download
(mysql-installer-community-8.0.22.0.msi) MD5: 4b90e669171b72247120b312a8c25dc9 Signature			

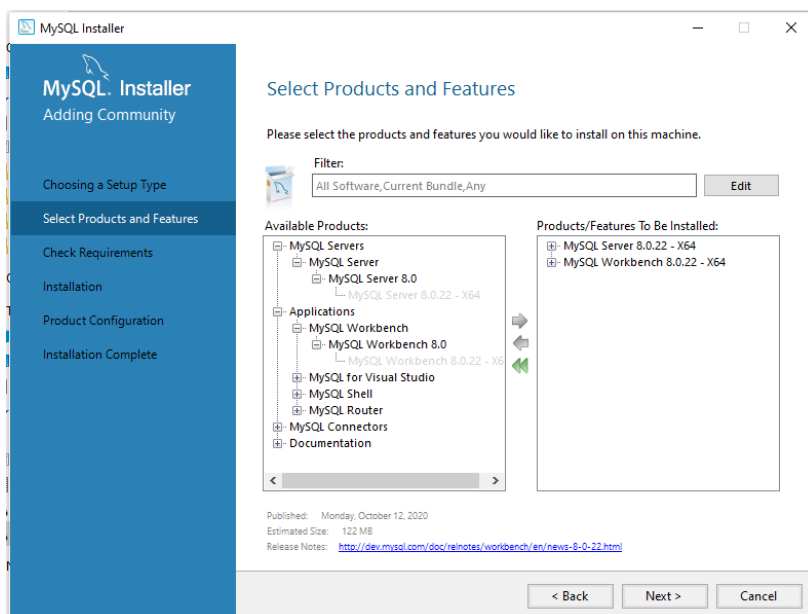

We suggest that you use the MD5 checksums and GnuPG signatures to verify the integrity of the packages you download.

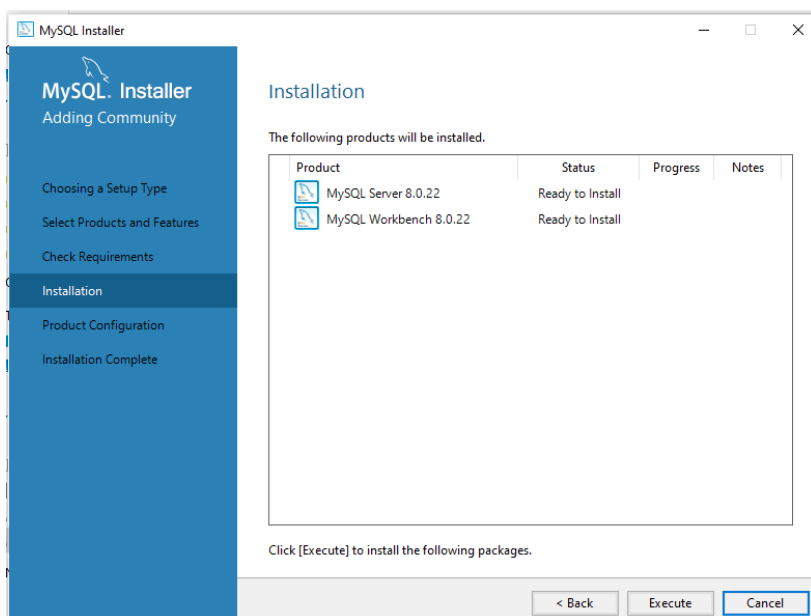

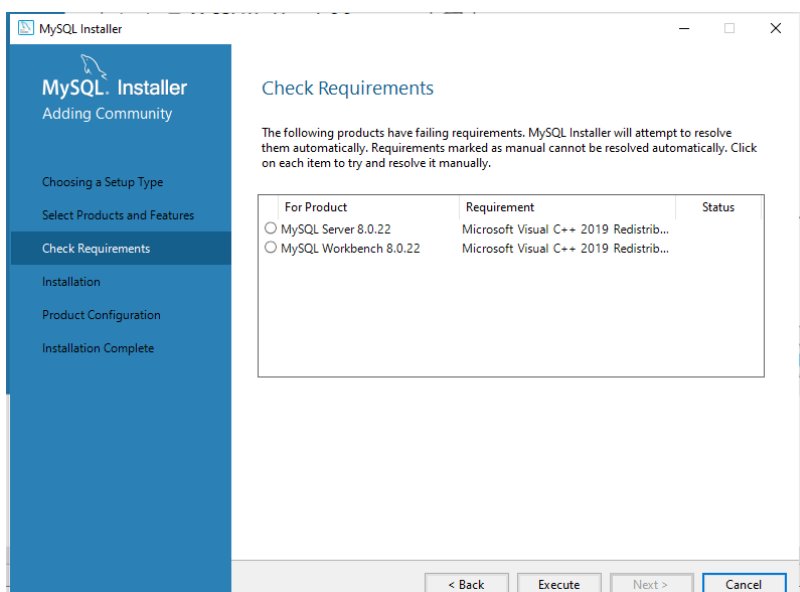

After the download is finished, run the installer.

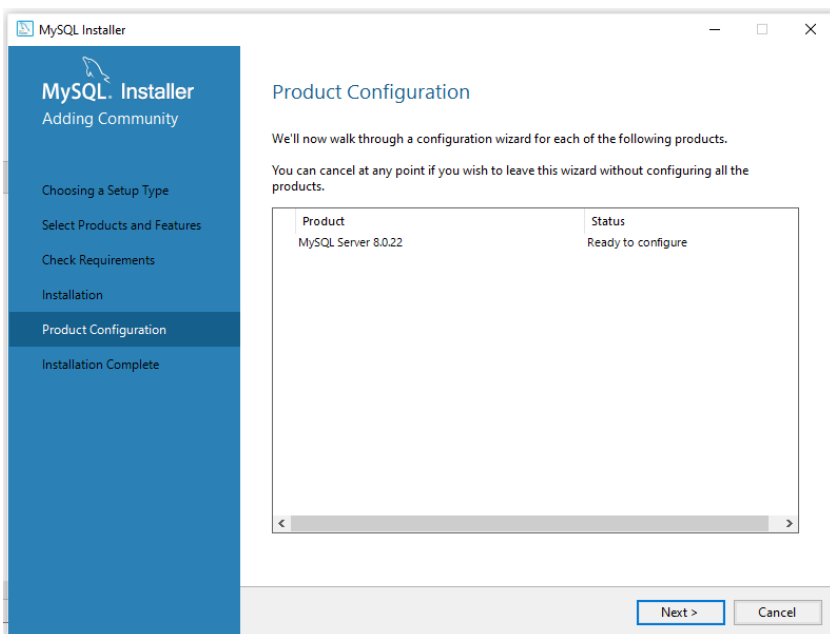

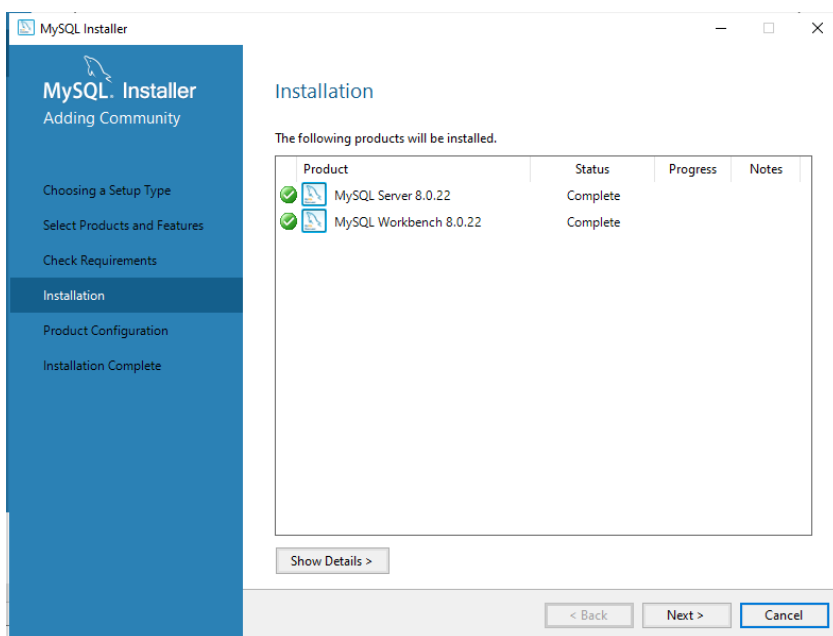

The installer window looks like this:

The following screen shots show how to install MySQL server and Workbench, which is a graphical interface client, step by step.

MySQL Installer

MySQL Server 8.0.22

Type and Networking

Windows Service

Apply Configuration

Type and Networking

Server Configuration Type

Choose the correct server configuration type for this MySQL Server installation. This setting will define how much system resources are assigned to the MySQL Server instance.

Config Type: Development Computer

Connectivity

Use the following controls to select how you would like to connect to this server.

☒ TCP/IP Port: 3306 X Protocol Port: 33060

☒ Open Windows Firewall ports for network access

☐ Named Pipe Pipe Name: MYSQL

☐ Shared Memory Memory Name: MYSQL

Advanced Configuration

Select the check box below to get additional configuration pages where you can set advanced and logging options for this server instance.

☐ Show Advanced and Logging Options

Apply Configuration

Authentication Method

☒ Use Strong Password Encryption for Authentication (RECOMMENDED)

MySQL 8 supports a new authentication based on improved stronger SHA256-based password methods. It is recommended that all new MySQL Server installations use this method going forward.

 Attention: This new authentication plugin on the server side requires new versions of connectors and clients which add support for this new 8.0 default authentication (caching_sha2_password authentication).

Currently MySQL 8.0 Connectors and community drivers which use libmysqlclient 8.0 support this new method. If clients and applications cannot be updated to support this new authentication method, the MySQL 8.0 Server can be configured to use the legacy MySQL Authentication Method below.

☐ Use Legacy Authentication Method (Retain MySQL 5.x Compatibility)

Using the old MySQL 5.x legacy authentication method should only be considered in the following cases:

- If applications cannot be updated to use MySQL 8 enabled Connectors and drivers.
- For cases where re-compilation of an existing application is not feasible.
- An updated, language specific connector or driver is not yet available.

Security Guidance: When possible, we highly recommend taking needed steps towards upgrading your applications, libraries, and database servers to the new stronger authentication. This new method will significantly improve your security.

Windows Service
Apply Configuration

Accounts and Roles

Root Account Password
Enter the password for the root account. Please remember to store this password in a secure place.

MySQL Root Password:

Repeat Password:

Password strength: **Weak**

MySQL User Accounts
Create MySQL user accounts for your users and applications. Assign a role to the user that consists of a set of privileges.

MySQL User Name	Host	User Role
-----------------	------	-----------

Apply Configuration

Windows Service

☒ Configure MySQL Server as a Windows Service

Windows Service Details
Please specify a Windows Service name to be used for this MySQL Server instance. A unique name is required for each instance.

Windows Service Name:

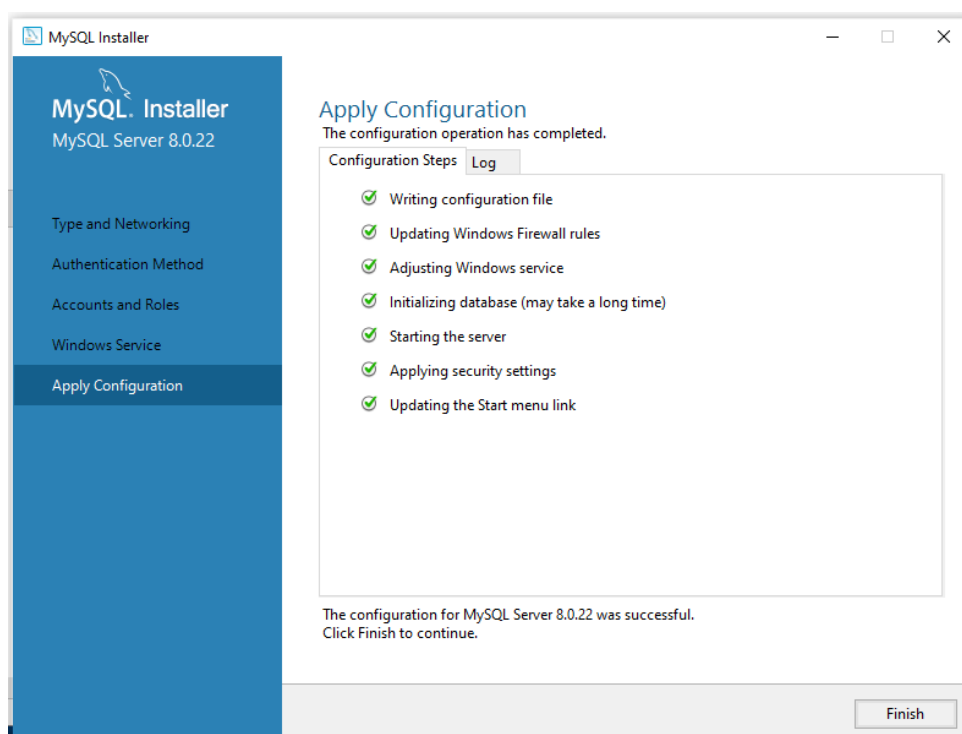

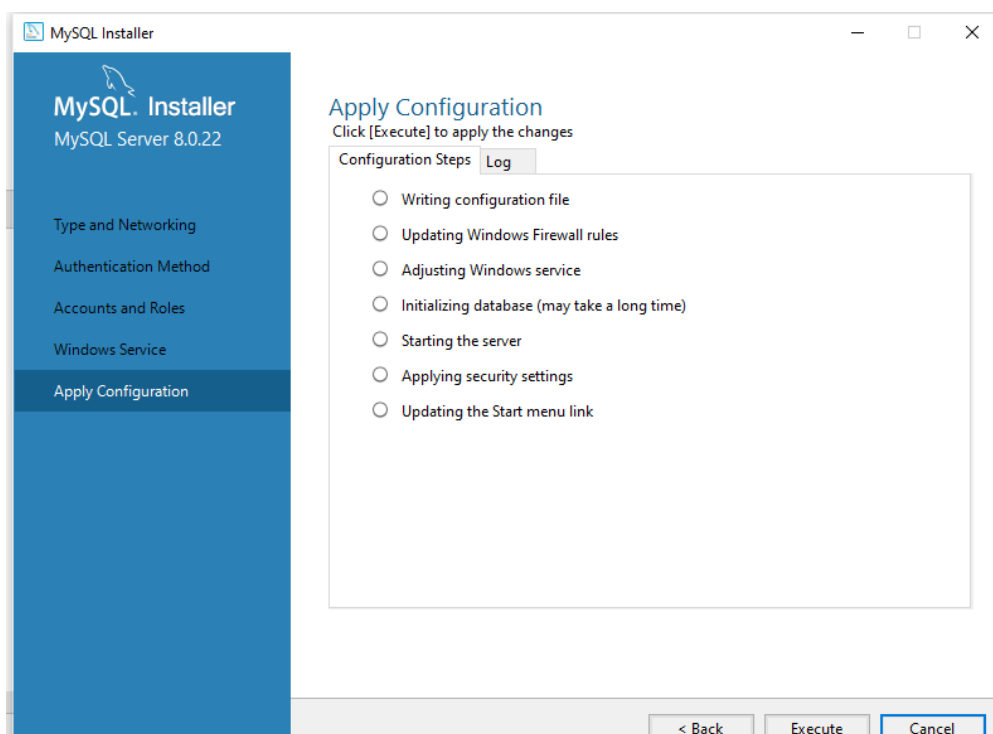

☒ Start the MySQL Server at System Startup

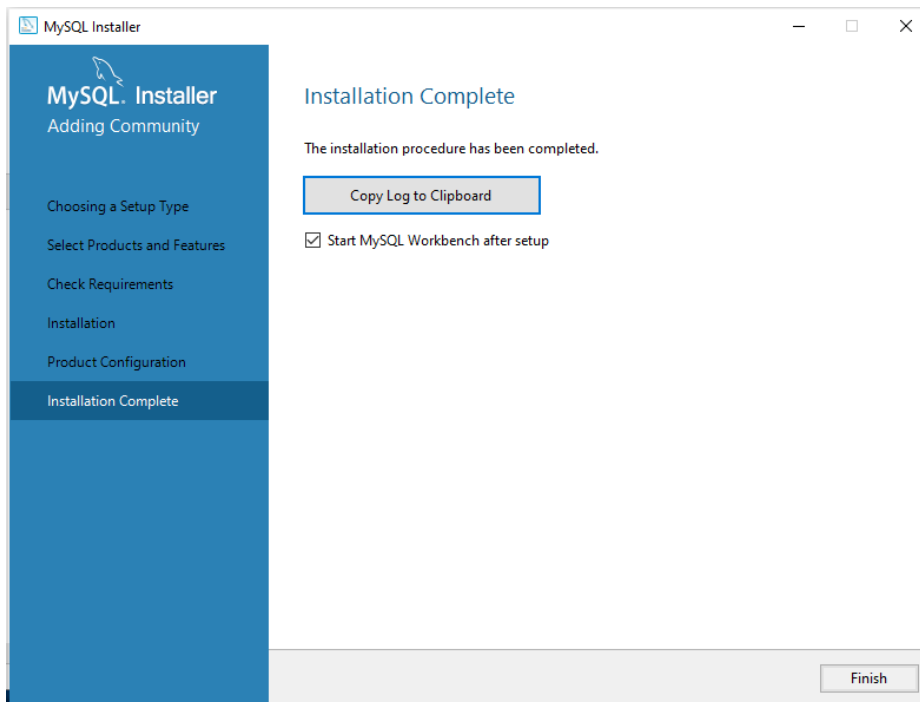

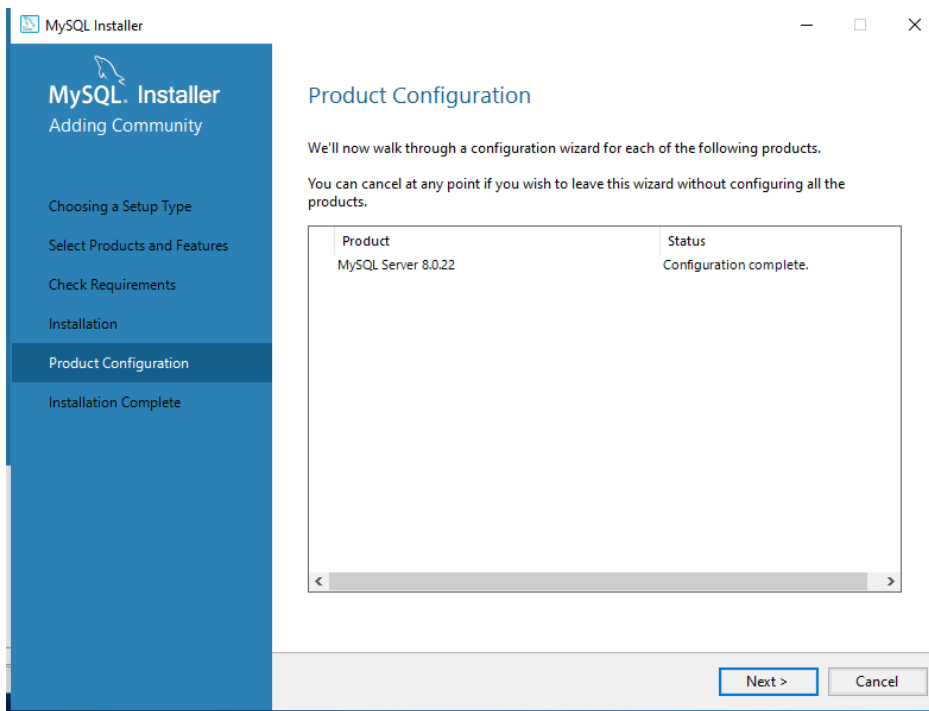

Run Windows Service as ...
The MySQL Server needs to run under a given user account. Based on the security requirements of your system you need to pick one of the options below.

☒ **Standard System Account**
Recommended for most scenarios.

☐ **Custom User**
An existing user account can be selected for advanced scenarios.

Note: The installation takes about 2 GB disk space. The Workbench path is C:\Program Files\MySQL\MySQL Workbench 8.0 CE\MySQLWorkbench.exe. You can drag the Workbench to the Windows desktop to create a short-cut so you can start the Workbench with a double left mouse button click.
